Legislative Management Solution

MANAGE LEGISLATIVE SESSION WITH CONFIDENCE + EFFICIENCY IN ONE SINGLE SOLUTION

Legislative session is such a dynamic and busy time for agency staff responsible for managing legislation as it moves through the legislative process. To help you and your team effectively stay on top of every piece of legislation and all relevant activities for each, the eWorld team developed enact, a comprehensive platform designed to centralize bill tracking, testimony management, and hearing management in one, easy-to-use solution.

enact helps you manage...

BILLS

Search, Track and Monitor

Easily find and monitor bills relevant to your organization, save searches for quick access and stay up to date on bill statuses and changes

Analyze Legislation

Dive deep into bill details, compare different versions of documents and identify related bills to understand developments

Empower Your Team

Provide your legislative team with the tools necessary to stay up to date and foster internal discussions and knowledge sharing

TESTIMONY

Collaborate, Create, and Route

Create, edit and manage testimony development with ease and ensure proper review and approval at every necessary organizational level

Seamlessly Manage Files

Attach supporting documents, generate professional PDFs of testimony ready for distribution

Automate Approval Process

Customize the approval workflow process to align with your organization's structure and ensure all necessary approvals are obtained

HEARINGS

Monitor Hearings

Receive manual and automated hearing notices to never miss an important hearing

TEAM

Control Access and Permissions

Customize and manage user access, roles and permissions to align with your agency's structure and ensure the right team members have the right access at the right time as critical legislation moves through the legislative process
